

$$\sum z = \prod \alpha$$

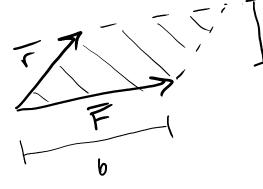

$$-2Fr = 0.5 \text{ kg-m}^2 \cdot (-50 \frac{\text{rad}}{52})$$

$$\prod \alpha$$

$$F = \frac{\prod \alpha}{2r}$$

Quick Moment moment

$$(10 + 25) \times (35)$$

$$= 3.1 + 0 = 3 \text{ N·m}$$
